IRONSTONE

BUSINESS COMES FIRST

Always On

Technology isn't about always staying up to date.
It's about always staying in business.

Brought to you by Ironstone

Your business, always on

Scalable, secure and compliant cloud tech to host your applications, data and protect your business continuity, allowing you to become an Always-On business.
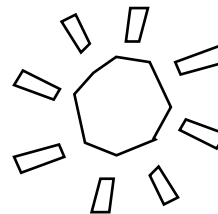

Your business, always on
Whether you want your business to be available 24/7 to your customers, or sleep well at night knowing your mission-critical data and applications are safe, we have the industry leading solutions to allow you to be an Always On business.
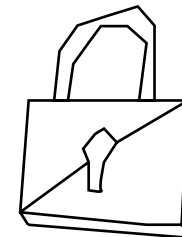

Mission-critical application hosting
We migrate, manage and monitor your mission critical applications to scalable, cost-effective and high-availability infrastructure in Azure, to make sure you can count on them, whenever you need them.

Complete peace of mind
When disasters strike, by human error, malware or technical malfunction, we keep you up and running with backups, site recovery, and high-speed disaster recovery solutions.
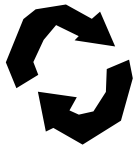

High-end IT security
Ranging from identity & access management to advanced threat analytics in your network, we have services to make sure you don't lose data, prevent unauthorised access and safeguard your integrity.

Your business, always on

Protecting and supporting your business.

Redundant backup
We implement redundancy to make sure backups are safe, and downtime is minimised or reduced to zero.

Monitoring
We monitor suspicious behaviour, application uptime, and other metrics to keep you up and running.
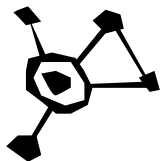

Secure access
Manage employee access to applications & data to ensure your data is not accessed unauthorised.
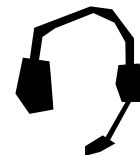

Always up to date
We make sure your infrastructure is kept up to date with patch management.

Monthly reporting and meetings
We make sure you get the insights you need and discuss your business and IT on a monthly basis.

Devoted support
Our team of experts is here to help you with any question or challenge you might have.

There might be other cloud providers that say business comes first.
Just not your business.

We are your business partner, enabling you to evolve by providing IT solutions that increase productivity, scalability, agility, and reliability. Allowing you to focus on what matters most, growing and thriving. With our broad experience in cloud computing, you are in the best of hands. Our approach to every customer case is:

Cloud Assessment of your environment and map it against your business needs.

Advise on solutions best fitted to your organisation.

Establish where you are, and where you want to go.

Engage in the speed and comfort which is best suited for you.

Accelerate the speed of your business
In a constantly changing world, where demands and requirements change by the minute, we create cloud solutions that enable and amplify the business outcomes of your organisation.

Cloud only, Microsoft first
We believe the cloud is the way forward for any business, based on our knowledge and experience we focus primarily on the incredible possibilities we have using Microsoft technology.

We bring the know-how
IT solutions by themselves don't solve anything. It's using them effectively, with the right training, which makes them shine. That's why we support our customers with education and great support.

A strong partner ecosystem
We stick to our strengths and focus on your IT solutions & architecture, that's why we partner with companies that assist with industry specific consultancy, systems integration and more.

We're in this together

Start accelerating your business today with Ironstone's rock solid cloud migration.

Now you have all the information you need, it's time to get started. And the good news is: we're here to help you, every step of the way.

As a partner who focuses on putting business before technology, Ironstone will prioritize your business needs and match that to the best-suited cloud infrastructure.

At the start of our engagement, we provide you with the business case including a complete solution designed to migrate your current IT infrastructure to the cloud, whether they are on-premises or hosted workloads.

Alongside this, we consult with you to develop an in-depth and step-by-step migration plan. Then we aim to migrate your infrastructure with zero to minimal downtime to ensure your day-to-day business operation is not disrupted.

As an organization with business as the primary driver for cloud enablement, Ironstone focuses on continuous improvement through education, devoted support and high-end IT security promoting business continuity and high performance.
